Key Columns in Report

Summary	Column I provides maltreatment in out-of-home care rate for reporting period by site, county (ALL) and statewide
Case-Level Detail	Column AL provides the length of the current/most recent placement episode Column AM provides the number of placement settings the child has had during the current/most recent placement episode

Other Comments/Considerations

- Report includes only cases where report is received during the reporting period and the initial assessment has been approved by a supervisor. Per the federal calculation of this standard, the child victim does not need to be in out-of-home care that the time of the report to be included in the measure.
- County-specific data will be subject to significant fluctuations and may not be reliable.
- The calculation for the National Standard (above) is established using available data from all states and is based on data reflecting a one-year period of activity.
